Promoting Talents

www.femtec.org

● Femtec – Promoting Talents!

Femtec is the international career platform for women in IT, engineering and the natural sciences. Femtec attracts talented females interested in the STEM fields, offers excellent career prospects to goal-oriented female students and helps outstanding STEM professionals with job placements.

● Careerbuilding-Programme

Alongside their studies, the Careerbuilding Programme prepares talented female STEM students for future leadership roles in business and/or science. Participants in the Careerbuilding Programme gain access to well-known technology companies as well as leading research institutes and technical universities.

● Femtec Young Talents

Femtec offers exciting programs for high-school students – both female and male! Guidance on university studies, excursions to companies, and interaction with role models who are studying or working motivate attendees in choosing STEM careers in science and business – and enables them to make well-considered decisions about which field to study.

● Advantages for Partners

All partners enjoy exclusive access to the Femtec.Network and the opportunity to contact, maintain close links to and recruit women in STEM fields with excellent qualifications. Affiliation with the Femtec.Network enables companies' and universities' to increase their ability to attract top women studying or working in STEM fields. Also Femtec.Network partners can use the knowledge and experience gained from years of scientific monitoring undertaken by Femtec e.g. to design career concepts and/or to develop company culture.

● Job Placement for Professionals

By offering face-to-face contact and long-term reliable interaction, Femtec enables professionals in STEM fields to purposefully design their career development through the various stages of their personal life. Femtec also helps companies and research institutes find highly qualified women with strong leadership skills.
